

Deepstream — SaaS Demo Video Blueprint & Prompt Master Guide

Complete Storyboard · UI Screenshots · Generative AI Video & Voiceover Prompts

1. Executive Summary & Video Strategy

This master guide outlines the complete 60–90 second SaaS product demo video production strategy for **Deepstream** (*The Ocean Pricer*). It combines high-resolution UI screen captures with precise Gen-AI prompts (Sora / Gen-3 / Midjourney / ElevenLabs) to produce a high-converting promotional video.

Target Audience	Commodity Traders, Quantitative Analysts, Macro Hedge Funds, Energy/Agri Futures Traders
Core Value Prop	Physical oceanography precedes commodity futures (Copper, Tuna, Crude Oil). 26-yr walk-forward backtest.
Video Format	60s / 90s 4K MP4 (16:9 for Web/YouTube, 9:16 crop for X/Reels/Shorts)
Voiceover Tone	Authoritative, crisp, Wall Street quantitative research tone (Non-hype, institutional)

2. 60-Second Video Storyboard & Voiceover Script

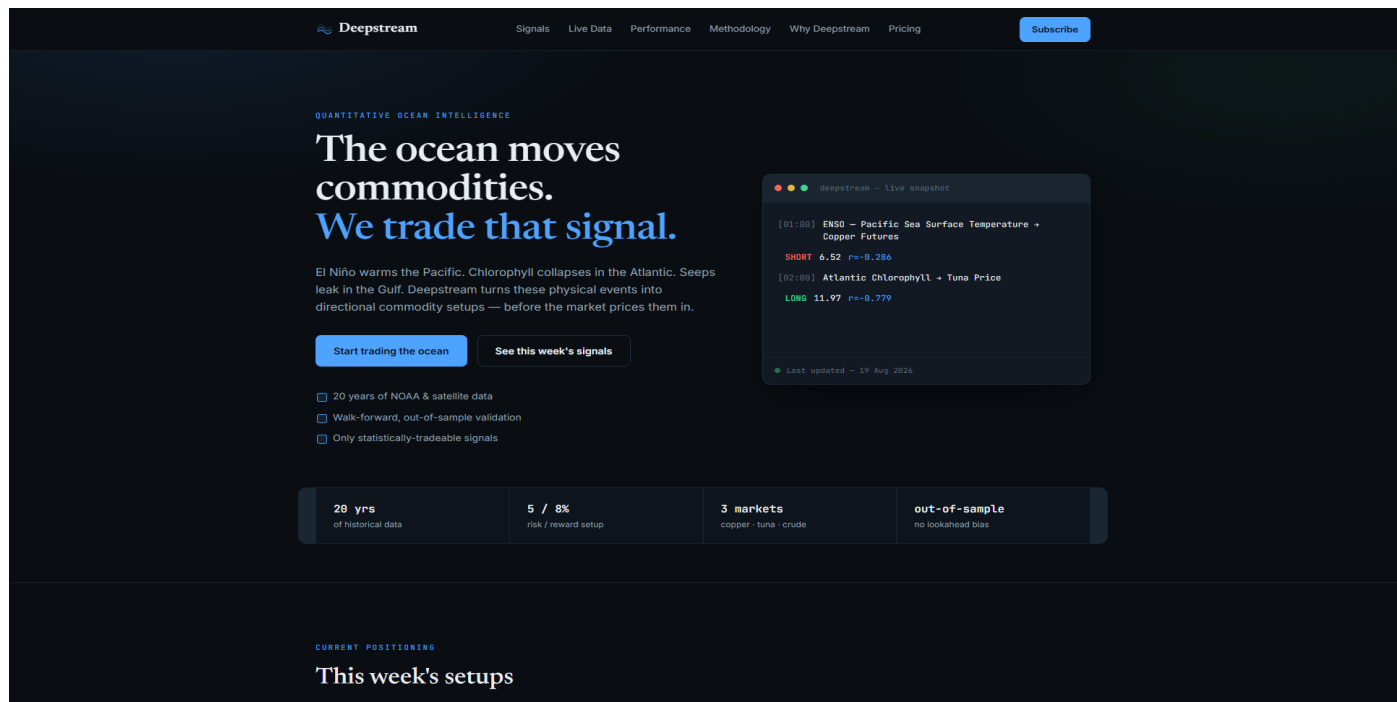

Time	Scene Name	Visual Action & UI Element	Voiceover Text (Onyx / ElevenLabs)
0:00 - 0:10	Scene 1: Hook	SST Thermal satellite ocean overlay zooming into Hero section	"Traditional commodity traders rely on lagging price charts... but 71% of Earth is ocean. What if ocean physical data held the leading edge?"
0:10 - 0:25	Scene 2: Setups	Pan across live Active Signals table (Copper, Tuna, Crude Oil)	"Meet Deepstream — the quantitative platform translating ocean temperature, chlorophyll, and plume signals into trade setups before markets react."
0:25 - 0:40	Scene 3: Track Record	Auto-zoom onto 26-Year Walk-Forward cumulative return (+140.5%)	"Every setup is validated out-of-sample over 26 years of history. No lookahead bias. Just raw Granger-causality proven edge."
0:40 - 0:50	Scene 4: Proof	Highlight zero-lookahead methodology & econometric comparison table	"Unlike typical signal providers, Deepstream publishes every single trade trade-by-trade and never fabricates setups in low-confidence regimes."
0:50 - 1:00	Scene 5: Telegram	Telegram Mobile/Desktop app notification card (User Screenshot Slot)	"Receive daily position updates and full entry parameters directly in your private Telegram Pro channel instantly upon publication."
1:00 - 1:10	Scene 6: CTA	Transition to Cashfree hosted checkout modal & pricing options	"Gain your quantitative ocean advantage today. Visit deepstreamofficial.netlify.app and activate your subscription."

3. Scene Breakdown & UI Screenshots

Below are the exact UI screenshots captured for each scene in the SaaS video guide.

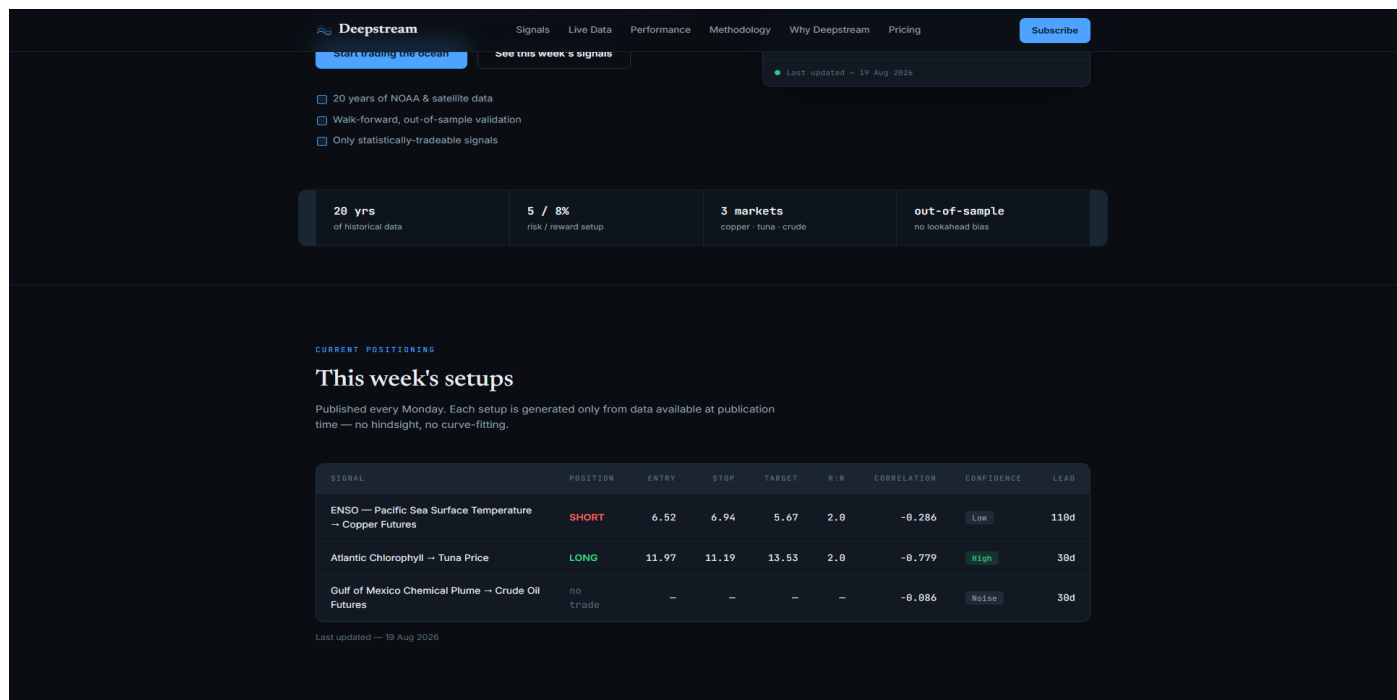

Scene 1: Hero Section & Ocean Intelligence Header

Visual Action: Slow pan across top navigation bar, main headline 'The ocean moves commodities. We trade that signal.', and live snapshot terminal.

Scene 2: Active Trade Signal Setups

Visual Action: Zoom in on Active Signals Table showcasing weekly setups (Pacific ENSO → Copper, Atlantic Chlorophyll → Tuna, Gulf Plumes → Crude Oil).

Scene 3: 26-Year Walk-Forward Track Record

Visual Action: Highlight cumulative performance statistics: 362 simulated trades, +140.5% return, 41.1% win rate, out-of-sample replay.

WHY DEEPSTREAM

Signal providers promise alpha.
We show our homework.

	DEEPSTREAM	TYPICAL SIGNAL SERVICE
Validation	Out-of-sample walk-forward	Cherry-picked backtest
Data discipline	Only data available at signal date	Full-history hindsight
Noise handling	LOW / NOISE never traded	Signals published regardless
Track record	Published, trade-by-trade	Selective screenshots
Stop / target	Fixed 5% / 8% risk architecture	Ad-hoc, undisclosed
Econometric proof	Granger causality tested	None shown

Scene 5: Private Telegram Pro Signal Delivery

Visual Action & User Note: *[USER DIRECTIVE ENFORCED]* This slot is reserved for your Telegram screenshot. Capture your Telegram mobile or desktop window showing instant alerts and drop it into this scene.

Scene 6: Pricing & Cashfree Hosted Checkout Modal

Visual Action: Smooth zoom onto ₹2,499/mo subscription card and the Cashfree payment modal with email/phone input fields.

4. Complete Master AI Prompt Collection

Use these copy-paste prompts in your Gen-AI tools to generate stock footage, voiceovers, thumbnails, and marketing copy for the SaaS video.

A. Generative AI Video Prompts (Runway Gen-3 / Sora / Hailuo / Luma)

Prompt 1: Dark Ocean Thermal Currents (Hero Intro)

Cinematic 4k video, dark futuristic oceanic globe with glowing neon blue and cyan sea-surface temperature (SST) anomaly heatmaps. Camera slowly zooms past Pacific Ocean thermal currents into digital data streams, dark aesthetic, octane render, 60fps --ar 16:9

Prompt 2: Subsea Chemical Plumes & Sensor Array

Underwater ultra-HD camera shot of subsea sensor array monitoring deep Gulf of Mexico ocean floor, glowing telemetry data points connecting ocean currents to energy pipelines, dark blue atmosphere, photorealistic lighting --ar 16:9

Prompt 3: Commodity Futures Holographic Trading Desk

High-tech financial quantitative trading desk at night, dual monitors showing dark mode commodity futures candlestick charts synchronized with ocean satellite imagery, smooth camera glide, cinematic depth of field --ar 16:9

B. Voiceover & Audio Prompts (ElevenLabs / OpenAI TTS / Play.ht)

ElevenLabs Voice Model Settings: Voice: *Adam* or *Onyx* | Stability: 0.65 | Clarity: 0.85 | Style Exaggeration: 0.15

C. Video Thumbnail & Cover Art Prompts (Midjourney / Flux)

Dark sleek YouTube video thumbnail, glowing 3D holographic globe with ocean thermal wave lines pointing directly into Copper and Crude Oil price tickers, bold text 'THE OCEAN PRICER', ultra-modern UI elements, 8k resolution --ar 16:9 --v 6.0

D. Social Media Launch Copy Prompts (Claude / ChatGPT)

Write a high-converting X (Twitter) thread launching a new SaaS video for Deepstream (The Ocean Pricer). Highlight: 1) Why physical oceanography precedes commodity markets, 2) The 26-yr walk-forward track record (+140.5% return), 3) Telegram Pro channel delivery. Include call to action link to deepstreamofficial.netlify.app. Tone: sharp, quantitative, non-hype.

E. Video Editor & Screen Studio Configuration Specs

Setting	Recommended Configuration
Canvas Resolution	3840 x 2160 (4K) exported to 1080p 60fps MP4
Cursor Smoothing	Screen Studio: Smart Auto-Zoom on Active Signal Table & Chart elements
Background Music	Dark synth/ambient tech track (e.g. 'Deep Ocean Quant'), audio level -22 dB with voiceover ducking
Kinetic Captions	Font: <i>Inter SemiBold</i> , Yellow accent color (#38bdf8 / #f59e0b), 2-3 words per burst
